

STANOLIND OIL AND GAS COMPANY

With regard to the exception to Rule No. 5 (a), we wish to state the following:

- (A) That the proposed non-standard gas proration unit of 160 acres consists of the E/2 of the SW/4 and the W/2 of the SE/4 of Section 33, T-20-S, R-37-E.
- (B) That the proposed non-standard gas proration unit lies wholly within a single governmental section.
- (C) That the entire proposed non-standard gas proration unit may reasonably be presumed to be productive of gas.
- (D) That the length or width of the proposed non-standard gas proration unit does not exceed 5280'.
- (E) That the entire proposed non-standard gas proration unit lies within the horizontal limits of the Sumont Gas Pool.
- (F) That by copy of this letter of application, all operators owning interest in the section in which the non-standard gas proration unit is situated and which acreage is not included in said non-standard gas proration unit and all operators owning interest within 1500' of the well have been notified by registered mail of this application as shown below.

A plat showing acreage to be dedicated, well locations and off-set ownership is attached.

We wish to advise that it is the intent of Stanolind Oil and Gas Company to propose a non-standard proration unit, at a later date, consisting of additional acreage within the boundaries of the same governmental section contingent on communitization arrangements with other operators. At that time, proper application will be made in the manner prescribed by the New Mexico Oil Conservation Commission.

Yours very truly,

Ralph L. Hendrickson
Field Superintendent
