

3. Hereto attached please find a plat of a portion of the Eumont Oil Pool showing subject described lease, offset lease ownership, location of the producing well, location of tank storage, and to the best of our knowledge, the location of the gas sales line directly effecting casinghead gas sales on that portion of Buffalo Oil Company's State "B" lease within the horizontal limits of the Eumont Oil Pool.

4. Buffalo Oil Company's State "B" well No. 3H is presently flaring 260 MCF of gas per day, based on recent GOR test, and is producing approximately 20 BOPD since its completion, March 9, 1957.

5. Negotiations are, at this moment, nearing completion by which all gas production from Buffalo Oil Company's State "B" lease, well No. 3H will be purchased by Continental Carbon Company whose offices are in Amarillo, Texas and Eunice, New Mexico.

6. A period of 30 to 60 days will be required to complete negotiations concerning casinghead gas sale from subject lease to Continental Carbon Company and to complete gas gathering line construction necessary to gather produced gas from applicant's lease.

Wherefore Buffalo Oil Company respectfully requests exception to paragraph 10 of Order R-520 as revised and amended by Order R-553 by administrative order, whereby applicant may continue to produce his well and recover his rightful share of oil production until such time that an adequate gathering system may be extended to applicant's lease.

BUFFALO OIL COMPANY

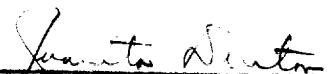

Max E. Curry
Dist. Supt.

MEC:ds

I, Max E. Curry, do hereby declare the statements made and information given in this application are true and correct to the best of my knowledge.
