NOTICE OF INTENTION TO ABANDON WELL.....			
<u>Notice of Intention to Gas Lift</u>	<u>X</u>		

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Skaggs B-23 No. 2

Hobbs, New Mexico September 12, 1950

Well No. 2 is located 1900 ft. from N line and 660 ft. from EX line of sec. 23

NW 1/4 Sec. 23 20 S 37 E NM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Cass Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3540 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Due to the increase in water production it is impossible to keep this well flowing naturally. Therefore, permission is requested to gas lift this well using gas from our Britt B-15 No. 3 gas well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Continental Oil Company

Title District Superintendent

The figure consists of two parts illustrating node-link relationships. The top part shows a sequence of four graphs where the number of nodes \$N\$ increases from 10 to 100, while the number of links \$L\$ remains constant at 10. The bottom part shows a sequence of four graphs where both the number of nodes \$N\$ and the number of links \$L\$ increase from 10 to 100.

Journal of Management Studies, 19(1), 67-80.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. The second step is to gather relevant information and data. This can involve research, consultation with experts, or collecting data from various sources.

3. The third step is to analyze the information and data. This involves identifying patterns, trends, and relationships that can help to answer the question or solve the problem.

4. The fourth step is to develop a solution or answer. This involves applying the analysis to the specific problem or question and formulating a response.

5. The fifth step is to communicate the solution or answer. This involves presenting the findings in a clear and concise manner, using appropriate language and format.

6. The sixth step is to evaluate the solution or answer. This involves assessing the effectiveness of the solution and identifying any areas for improvement.

7. The seventh step is to implement the solution or answer. This involves putting the solution into practice and monitoring its progress.

8. The eighth step is to review the solution or answer. This involves reflecting on the process and the outcome, and identifying any lessons learned.

9. The ninth step is to share the solution or answer. This involves communicating the findings to others, either through a report, presentation, or other means.

10. The tenth step is to conclude the process. This involves summarizing the key findings and the overall outcome of the process.
