The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to a total depth of approximately 3800' with rotary tools in order to continue development of Cuenca gas reserves and to meet demands of the USGS for development of gas reserves underlying Federal leases. All casing points will be cemented in accordance with approved methods of the USGS and any other special requirements will be complied with.

It is planned to use the following casing pattern: 8 5/8" to be set at 300' and cemented with approximately 250 sacks, cement to be circulated. 5 1/2" to be set at 3800', cemented with approximately 1,000 sacks, and to be perforated opposite the pay zone.

Permission to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Title District Superintendent

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the subject and the objectives of the study.

2. The second part of the report is a detailed description of the methodology used in the study. It discusses the data sources, the data collection methods, and the data analysis methods.

3. The third part of the report is a detailed description of the results of the study. It discusses the findings of the study and the conclusions drawn from the results.

4. The fourth part of the report is a discussion of the implications of the study. It discusses the implications of the findings for the field of study and for the general public.

5. The fifth part of the report is a conclusion. It summarizes the findings of the study and the conclusions drawn from the results.

6. The sixth part of the report is a list of references. It lists the sources of information used in the study.

7. The seventh part of the report is an appendix. It contains additional information that is not included in the main body of the report.

8. The eighth part of the report is a glossary. It defines the terms used in the report.
