17. Describe (in brief) any other completed operations of this well (state all work). SEE RULE 1103.				

This well is dually completed as a gas well in the Eumont (Gas) Pool and Eunice Monument (Oil) Pool. Skelly Oil Company is conducting periodic but continuing efforts to restore the Eumont gas zone to production; however, at this time we are unable to get the well to produce into the sales line because of the well being loaded with residual load water from a recent down-hole mechanical repair job. We expect to get the well unloaded and producing again during the first quarter of 1976. Well is currently shut down.

12. I hereby certify that the information above is true and complete to the best of my knowledge.
