

## OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

OIL CONSERVATION COMMISSION,  
SANTA FE, NEW MEXICO  
Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the The

Atlantic Refining Company State "O" Well No. 1 in the  
Company or Operator Lease  
1900\* FWL & 600\* FWL of Sec. 32, T. 20S, R. (37) 37 E, N. M. P. M.,  
Burice Field, Lea County.

The dates of this work were as follows: 4-4-50Notice of intention to do the work was (was not) submitted on Form C-102 on                      19          and approval of the proposed plan was (was not) obtained. (Cross out incorrect words.)

## DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

The well was shut-in 24 hours prior to taking tubing pressure with a dead weight tester. Shut-in tubing pressure was 1072 psig. A back pressure test conducted on 4-7-49 resulted in the following results: S.I. tubing pressure of 1150 psig, back pressure test curve with a vertical slope of 37.4°, & an absolute open flow of 6,400 MCF/24 hours. Based on this back pressure test and a S.I. tubing pressure of 1072 psig, the calc. ABSOLUTE OPEN FLOW IS 5,760 MCF/24 HRS.
