

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the

The Atlantic Refining Company State 0 Well No. 1 in the
Company or Operator Lease
1980' FML & 660' FWL of Sec. 32, T. 37 E, R. 20 S, N. M. P. M.,
Runice Field, Lea County.

The dates of this work were as follows: 4-18-37

Notice of intention to do the work was [was not] submitted on Form C-102 on _____ 19____

and approval of the proposed plan was [was not] obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Water shut-off test on 10 $\frac{3}{4}$ " surface casing.

Cement was allowed to set 48 hours. The plug was drilled and
the hole bailed dry. Waited 30 minutes. No water.

1. The first part of the paper is devoted to the

study of the properties of the

operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$
 for $f \in L^p(\mathbb{R})$, $1 < p < \infty$. It is shown that T is a bounded operator from $L^p(\mathbb{R})$ into $L^p(\mathbb{R})$ and that its norm is equal to 1. The second part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$
 for $f \in L^p(\mathbb{R})$, $1 < p < \infty$.

It is shown that T is a bounded operator from $L^p(\mathbb{R})$ into $L^p(\mathbb{R})$ and that its norm is equal to 1.

The third part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$
 for $f \in L^p(\mathbb{R})$, $1 < p < \infty$.

It is shown that

$$Tf(x) = \int_0^x f(t) dt$$
 for $f \in L^p(\mathbb{R})$, $1 < p < \infty$.

It is shown that T is a bounded operator from $L^p(\mathbb{R})$ into $L^p(\mathbb{R})$ and that its norm is equal to 1.

The fourth part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$
 for $f \in L^p(\mathbb{R})$, $1 < p < \infty$.

It is shown that T is a bounded operator from $L^p(\mathbb{R})$ into $L^p(\mathbb{R})$ and that its norm is equal to 1.

The fifth part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$
 for $f \in L^p(\mathbb{R})$, $1 < p < \infty$.

It is shown that T is a bounded operator from $L^p(\mathbb{R})$ into $L^p(\mathbb{R})$ and that its norm is equal to 1.

The sixth part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$
 for $f \in L^p(\mathbb{R})$, $1 < p < \infty$. It is shown that T is a bounded operator from $L^p(\mathbb{R})$ into $L^p(\mathbb{R})$ and that its norm is equal to 1.

The seventh part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$
 for $f \in L^p(\mathbb{R})$, $1 < p < \infty$. It is shown that T is a bounded operator from $L^p(\mathbb{R})$ into $L^p(\mathbb{R})$ and that its norm is equal to 1.

The eighth part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$
 for $f \in L^p(\mathbb{R})$, $1 < p < \infty$. It is shown that T is a bounded operator from $L^p(\mathbb{R})$ into $L^p(\mathbb{R})$ and that its norm is equal to 1.

The ninth part of the paper is devoted to the study of the properties of the operator T defined by the formula
