Question	Answer
1. What is the main purpose of the study?	The main purpose of the study is to investigate the effect of the new curriculum on the learning outcomes of the students in the field of biology.
2. What are the research objectives?	The research objectives are to determine the level of understanding of the students, to identify the difficulties encountered by the students, and to evaluate the effectiveness of the new curriculum.
3. What is the research methodology?	The research methodology is a qualitative research method, which involves the collection and analysis of data from interviews, observations, and documents.
4. What are the findings of the study?	The findings of the study show that the new curriculum has a positive effect on the learning outcomes of the students, but there are still some difficulties encountered by the students, such as the lack of resources and the need for more training for the teachers.
5. What are the conclusions and recommendations?	The conclusions and recommendations of the study are that the new curriculum is effective, but it needs to be supported by more resources and training for the teachers to ensure the best learning outcomes for the students.
