

3. Sinclair will comply with all the rules and regulations of the Commission applicable to dual completions and the separation of pay zones.
4. Sinclair believes that the manner and method of this proposed dual completion is mechanically feasible and practical.
5. The Nonstandard Gas Proration Unit to be assigned subject well consists of two contiguous quarter-quarter sections and is described as the W/2 of the SW/4 of Section 26-21S-37E, Lea County, New Mexico. The well is located 660 feet from the West and South lines of the Unit. The length or width of this unit does not exceed 2,640 feet and it lies wholly within a single governmental quarter section. The royalty interests and the leasehold interests are common under the unit. Subject unit may be reasonably presumed to be productive of gas from the Tubb Gas Pool.

Sinclair believes that the granting of this application is in the interest of conservation and the protection of correlative rights.

Sinclair has notified all offset operators as defined in Orders R-316 and R-586 of this application by copy thereof via registered mail. Said operators are listed on next page.

Sinclair, therefore, requests that this application, both for permission to dually complete and for the establishment of an 80 acre Nonstandard Proration Unit in the Tubb Gas Pool be granted by the Commission.

I certify that the statements made in this application are true and accurate to the best of my knowledge and belief.

Yours very truly,

SINCLAIR OIL & GAS COMPANY
