Gentlemen:

Attached is Continental Oil Company's application to the
Oil Conservation Commission of New Mexico for permission to dually
complete its Lockhart A-27 No. 1 well which is self-explanatory.

This application is submitted to you as offset operators
in compliance with Rule 112-A (c).

Yours truly,

J. R. Christolwick

BEFORE THE OIL CONSERVATION COMMISSION
OF THE
STATE OF NEW MEXICO

IN THE MATTER OF THE APPLICATION OF
CONTINENTAL OIL COMPANY FOR AN ORDER
GRANTING IT PERMISSION TO DUAL COMPLETE
ITS Lockhart A-27 #1
SW/4 OR NE/4

SECTION , T. , R. , N.M.P.M.
LEA COUNTY, NEW MEXICO

A P P L I C A T I O N

Comes now CONTINENTAL OIL COMPANY, a Delaware Corporation, hereinafter called "Applicant" and respectfully requests the Oil Conservation Commission of the State of New Mexico to issue an order authorizing Applicant to dually complete its Lockhart A-27 #1

well, located 1980 feet from the North line and 1980 feet from the East line of Section 27, T. 21, R. 37, N.M.P.M., Lea County, New Mexico, in the Drinkard Oil Pool and the Tubb Gas Pool, and in support thereof would show the following:

The proposed gas unit contains 160 acres consisting of contiguous quarter quarter sections.

The dual completion of said well in the Drinkard for oil and the Tubb for gas is in the interest of conservation and the protection of correlative rights.

Segregation of the producing intervals will be made by appropriate packer installation and said well will be equipped so there can be no comingling of well fluids in producing the gas through the annulus between the tubing and casing, and the oil through the tubing. Said well will be equipped in such a manner that reservoir pressures may be determined separately for each of the two specified pools and the well head equipment to be equipped with all necessary connections to permit accurate measurement of any natural gas, oil, or oil and gas produced from each separate pool as may be required by the Commission.

Attached to this application is a plat showing the location of said well and surrounding wells and leasesholds with the acreage to be assigned the proposed gas unit outlined in red, a plat showing the mechanical condition of said well at present and after the proposed dual

completion, and a radioactivity survey of said well.

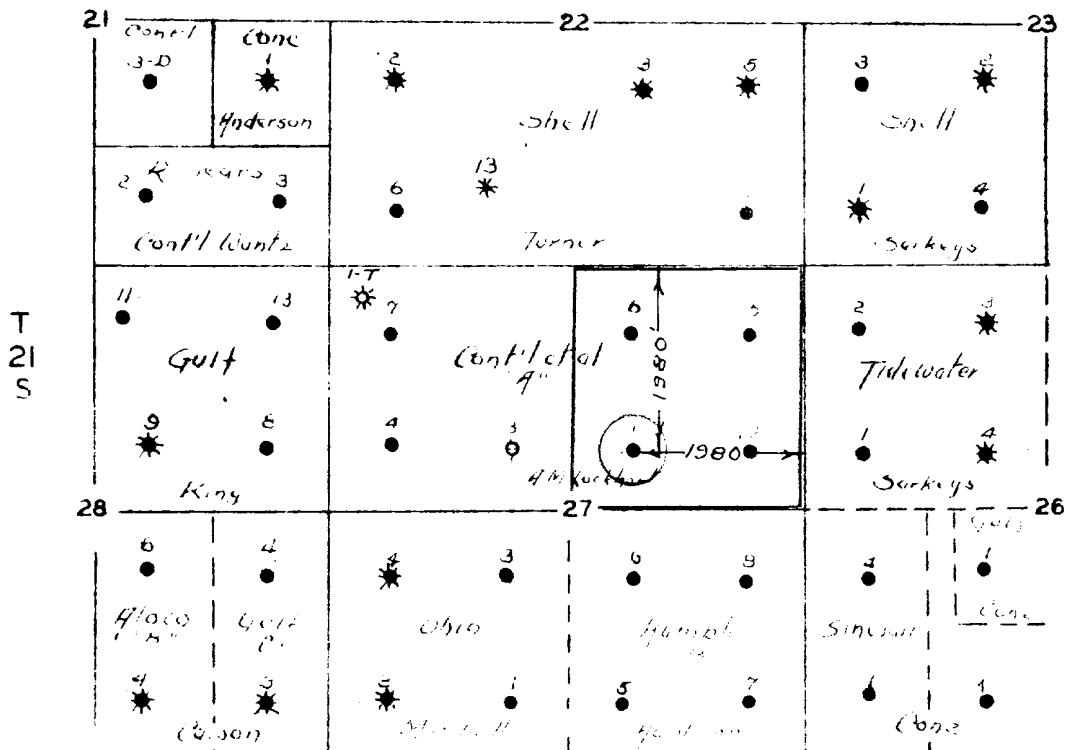

All offset operators have been duly notified by copy of this application.

WHEREFORE, Applicant respectfully requests the Oil Conservation Commission of the State of New Mexico enter its order authorizing Applicant to dually complete said well in accordance with the foregoing application and rules and regulations of the Commission.
