Hobbs, NM 88241-1980

Dear Mr. Sexton:

Lockhart A-27 11-H Packer Leakage Test

We recently received the attached notice requesting a packer leakage test on the subject well. This well is no longer a multiple completion. It was originally a Blinbry-Drinkard dual. The Drinkard was abandoned and a Paddock recompletion attempted. During the Paddock completion the casing collapsed in the wellbore. Currently all three of these potential producing zones are isolated with cement plugs and the well is inactive pending evaluation.

Please let me know if you need any other information at this time.

Very truly yours,

RE: Packer Leakage Tests

Gentlemen:

A Packer Leakage Test was due to have been filed no later than
October 10, 1992 for the following wells:

Lockhart A-27 11-H 27-21-37 Blinebry Oil & Gas

(If we do not receive a PLT by Nov. 2, 1992, Your allowable will be cancelled.)

Please submit a Packer Leakage Test for each of the above listed wells at the
earliest possible date in order to avoid allowable cancellation for these
wells,

Very truly yours,

OIL CONSERVATION DIVISION
