A. M. Lockhart A-27 No. 3

Hobbs, New Mexico February 26, 1951

Well No. 3 is located 1980 ft. from [N] line and 1980 ft. from [W] line of sec. 27
 1/4 Sec. 27 (1/4 Sec. and Sec. No.) 21 S 37 E NMPM
 Drinkard (Field) Lea (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3417 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Lockhart A-27 No. 3 has been proven unproductive in both the Drinkard and Tubb horizons and has been temporarily abandoned since January 18, 1950.

In order to test the Connell and Ellenburger formations, it is now proposed to deepen the subject well to approximately 7540' (old total depth 6610'), set a 5" OD liner on bottom and cement with approximately 200 sacks cement. The liner will be perforated opposite the pay zone as indicated by a radioactivity survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
