17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1503.

Purpose: Recomplete from Wantz Abo to Blinebry.

The W. S. Marshall "B" No. 9 has been temporarily abandoned in the Wantz Abo since 1973. On March 27, 1985 a CIBP was set at 6700' and 2 sacks of cement dumped on top. PBTD 6676'.

A casing leak was found from 5125 - 65. These were old Paddock perms that were originally squeezed in 1969. They were squeezed again with 150 sacks of Class "C" neat. After being drilled out they tested good to 1000 psi.

On April 2, 1985 the Blinebry was perforated at 5652, 55, 79, 92, 99, 5717, 21, 44, 57, 82, 90, 5810, 31, 43, 73, 81, 92, 99, 5917 w/l JSPF. The next day these perms were acidized with 3000 gallons of 15% HCl. On April 4th this zone was fraced with 50,000 gallons of gelled KCl water carrying 122,000# of sand. The well will now be swab tested.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
