Attn: Mr. William J. LeMay  
Director

Gentlemen:

Chevron U.S.A. Inc. respectfully requests administrative approval to amend Order NO. R-2852 by reducing the 120 acre non-standard Blinebry Gas proration unit to an 80 acre non-standard gas proration unit. The reason for the change is the recently recompleted J.N. Carson (NCT-C) Well No. 9 as a Blinebry Oil well. Well No. 9 is located 2,080' FSL and 766' FEL (Unit I) Section 28, T21S, R37E, Lea County, New Mexico. The proposed 80 acre unit will consist of the SE/4 SE/4 of Section 28 and the NE/4 NE/4 of Section 33, T21S, R37E. The J.N. Carson (NCT-C) No. 6 well will continue to be dedicated to the proposed 80 acre unit. Well No. 6 is located 330' FSL and 965' FEL (Unit P) of Section 28, T21S, R37E. In support of this application, Chevron U.S.A. Inc. states the following facts:

1. Order No. R-2852 (attached copy) dated December 28, 1964, approved a 120 acre non-standard gas proration unit in the Blinebry Oil and Gas Pool comprising of the E/2 SE/4 of Section 28, T21S, R37E, and the NE/4 NE/4 of Section 33, T21S, R37E NMPM, Lea County, New Mexico, to be dedicated to J.N. Carson (NCT-C) No. 6 in Unit P of Section 28.
2. Chevron's J.N. Carson (NCT-C) Well No. 9 located in Unit I of Section 28, T21S, R37E, has recently been completed as a Blinebry Oil well. This reduces the non-standard proration unit for Well No. 6 from 120 acres to 80 acres.

Chevron U.S.A. Inc has mailed, by certified mail, a copy of this application to the offset Operators.

In view of the facts submitted, Chevron U.S.A. Inc. requests that administrative approval of the amendment to Order No. R-2852 be granted. If additional information is required, please contact me at 915/687-7152.
