

OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING

THEORY OF THE EARTH

CHAPTER I

THE EARTH AND ITS HISTORY

The Earth is a planet of the solar system, and is the only one of the planets which is known to support life. It is a sphere, and is composed of a solid inner core, a liquid outer core, and a solid crust. The crust is the outermost layer, and is composed of the rocks and minerals which form the surface of the Earth.

The Earth is divided into four main parts, or continents, which are the North America, South America, Europe, and Asia. These continents are separated by oceans, and are surrounded by water.

The Earth is also divided into smaller parts, called countries or states. These are the political divisions of the Earth, and are used for the purpose of governing and administering the land. The countries and states are separated by boundaries, and are each under the control of a government.

The Earth is a very large planet, and it takes a long time to travel around it. It is estimated that it would take about a year to travel around the Earth once.

The Earth is a very interesting planet, and it is full of many things that we can learn about. We can learn about the history of the Earth, and we can learn about the different kinds of plants and animals that live on it.

The Earth is a very beautiful planet, and it is our home. We should take care of it, and we should love it.
