Mr. Joe D. Ramey
New Mexico Oil Conservation Commission
Post Office Box 2088
Santa Fe, New Mexico 87501

Dear Sir:

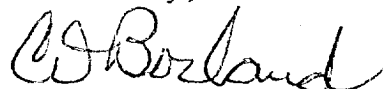

Your administrative approval is requested for a 160 acre non-standard proration unit in the Tubb Gas Pool, comprising the NE/4 SW/4 and W/2 SE/4, section 28 and the NW/4 NE/4, section 33, all in 21-S, 37-E, Lea County, to be dedicated to our J. N. Carson (NCT-A) well No. 9, located 1874' FSL and 2086' FWL, section 28, 21-S, 37-E.

In support of this application the following facts are submitted:

1. This acreage was originally dedicated to well No. 6, located 2086' FSL and 2086' FEL, section 28, 21-S, 37-E, under R-1253. This well was recently abandoned in the Tubb zone and well No. 9 was dualled in the Tubb Gas zone with existing Blinebry Oil and Gas, necessitating this request.
2. There are no other wells producing from the Tubb zone in this proposed non-standard gas proration unit.
3. The attached plat shows well No. 9 and the proposed 160 acre non-standard unit outlined in red.
4. All offset operators have been furnished a copy of this application.

Your early consideration will be appreciated.

Yours truly,

C. D. BORLAND
