Re: Request for Administrative Approval
To Change the Unit Well Attributed
To a Previously Approved Non-Standard
Gas Proration Unit, Blinebry Gas Pool,
Lea County, New Mexico

Gentlemen:

The Oil Conservation Commission by Order No. R-1253 in Case No. 1506 approved four Non-Standard Gas Proration Units in the Blinebry and Tubb Gas Pools covering Gulf's J. N. Carson (NCT-A) and (NCT-C) leases in Sections 28 and 33, Township 21 South, Range 37 East, Lea County, New Mexico. A 160-acre Blinebry Non-Standard Gas Proration Unit was approved covering the NE/4 SW/4 and the W/2 SE/4 of Section 28, and the NW/4 NE/4 of Section 33. This Unit was dedicated to the J. N. Carson (NCT-A) Well No. 4, located 554 feet from the south line and 2086 feet from the east line of Section 28. The J. N. Carson (NCT-A) Well No. 9, located 2086 feet from the west line and 1874 feet from the south line of Section 28 has been recompleted as a Blinebry Gas well. This well will be able to produce the full allowable for the 160-acre Unit whereas Well No. 4 is classified as marginal.

It is respectfully requested that the 160-acre Non-Standard Unit described above and now dedicated to the J. N. Carson (NCT-A) Well No. 4 be dedicated to the J. N. Carson (NCT-A) Well No. 9. Well No. 4 will be shut in upon approval of this request. The attached plat shows the Non-Standard Unit outlined in red and Well No. 9 circled in red.

All offset operators within 1500 feet of the Unit well and in the quarter sections in which the Non-Standard Unit is located have been furnished a copy of this request.

Respectfully submitted,

W. A. Shellshear
