17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

A pulling unit was rigged up on this well April 19, 1983 to abandon the Blinebry and Tubb zones and recompleate this well in the Wantz Abo. The Tubb perms f/6230' - 6100' were squeezed with 150 sx Class "H" on April 23, 1983, the Blinebry perms f/5570' - 5620' were squeezed with 100 sx Class "H" on April 23. The Blinebry perms were drilled out and pressure tested to 1000#. The Tubb perms were drilled out and tested to 1000# but bled to 0# in six minutes. On April 27 the Tubb perms were squeezed again with 100 sx Class "H" cement. They will then be drilled out and tested to 1000#. The hole will be cleaned out to a 7911' TD. The Wantz Abo zone will be selectively perforated from 6794' - 7152'.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
