Figure 1 is a line graph titled "Percentage of total population in the labor force by age group, 1960-1980". The vertical axis (Y-axis) is labeled "Percentage of total population in the labor force" and ranges from 0 to 100 in increments of 10. The horizontal axis (X-axis) is labeled "Year" and ranges from 1960 to 1980 in increments of 10. There are six data series representing different age groups: 15-24, 25-34, 35-44, 45-54, 55-64, and 65+. The 15-24 age group starts at approximately 25% in 1960 and declines steadily to about 15% in 1980. The 25-34 age group starts at approximately 15% in 1960 and rises slightly to about 20% in 1980. The 35-44 age group starts at approximately 10% in 1960 and rises slightly to about 15% in 1980. The 45-54 age group starts at approximately 5% in 1960 and rises slightly to about 10% in 1980. The 55-64 age group starts at approximately 2% in 1960 and rises slightly to about 5% in 1980. The 65+ age group starts at approximately 1% in 1960 and rises slightly to about 2% in 1980.
