Re: Form C-110s on Pruitt #1 and #2
Sec. 31-21-37

Gentlemen:

Reference is made to our telephone converation of this morning concerning the classification of your Pruitt wells. Our error was in the reclassification of the #1 well, which will remain in the Penrose-Skelly, while the #2 well will be classified as a Eumont well.

If these wells are to be produced into common storage, it will be necessary for you to request permission to comingle oil from the two pools by incorporating the following statement in the C-110s which you will submit:

"Permission is hereby requested to produce this well, completed in the _____Pool, into common storage with wells on the same lease currently prorated in the _____Pool."

We apologize for the inconvenience we have caused you by this error, and we appreciate your cooperation.

Yours very truly,

OIL CONSERVATION COMMISSION

Re: Form C-126 on Truitt #1 and #2
Sec. 31-21-37

Gentlemen:

Reference is made to our telephone conversation of this morning concerning the classification of your Truitt wells. Our error was in the reclassification of the #1 well, which will remain in the Tomaso-likely, while the #2 well will be classified as a Ranch well.

If these wells are to be produced into common storage, it will be necessary for you to request permission to commingle oil from the two pools by incorporating the following statement in the C-126 which you will submit:

"Permission is hereby requested to produce this well, completed in the _____ Pool, into common storage with wells on the same lease currently prorated in the _____ Pool."

We apologize for the inconvenience we have caused you by this error, and we appreciate your cooperation.

Yours very truly,

OIL CONSERVATION COMMISSION
