Re: Proposed NSP 362
Proposed NSL

Gentlemen:

I have examined the application dated 3/6/57
for the Amerade State D "B" #1 32-21-37
Operator Lease and Well No. S-T-R

and my recommendations are as follows:

O.K.—E.J.F.

O.K.—J.W.R.

Yours very truly,

OIL CONSERVATION COMMISSION

Engineer

1. The first step is to identify the variables involved in the problem.

2. The second step is to determine the relationships between these variables.

3. The third step is to formulate a hypothesis or model.

4.

5. The fourth step is to collect data and perform experiments.

6. The fifth step is to analyze the data and draw conclusions.

7. The sixth step is to communicate the results.

8. The seventh step is to evaluate the results.

9.

10. The eighth step is to apply the results to real-world situations.

11. The ninth step is to refine the model or hypothesis based on the results.

12. The tenth step is to repeat the process as necessary.

13. The eleventh step is to document the process and results.

14. The twelfth step is to share the results with the scientific community.

15. The thirteenth step is to use the results to inform policy and practice.

16. The fourteenth step is to continue to explore the topic and build on the existing knowledge.

17. The fifteenth step is to collaborate with other researchers and experts.

18. The sixteenth step is to stay up-to-date on the latest research and developments.

19. The seventeenth step is to maintain a high level of integrity and honesty.

20. The eighteenth step is to be open to criticism and feedback.

21. The nineteenth step is to be persistent and resilient.
