

OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

OIL CONSERVATION COMMISSION,
SANTA FE, NEW MEXICO
Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the _____
Gulf Oil Corporation Wm. T. McCormack Well No. 14 in the

Company or Operator

Lease

SW NE

of Sec. 32

T. 21S

R. 37E

N. M. P. M.,

Drinkard

Field,

Lea

County.

The dates of this work were as follows: Cemented on December 14, 1948. Tested on December 16, 1948.

Notice of intention to do the work was (~~was~~) submitted on Form C-102 on December 15, 1948
and approval of the proposed plan was (~~was~~) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

After waiting forty-eight hours, the casing was tested with 1200# pressure applied for 30 minutes. The plug was drilled and the casing and cement were tested with 1200# pressure applied for 30 minutes. Both tests were OK, and after approval of Mr. Yarbrough, State Oil and Gas Inspector, preparations are being made to complete the well.

THEORY OF THE EARTH

CHAPTER I. OF THE ORIGIN OF THE EARTH.

The origin of the earth is a subject which has occupied the minds of philosophers from the earliest ages. Some have supposed that it was created out of nothing, and others that it was formed out of pre-existing matter. The former opinion is supported by the doctrine of creation, which is the basis of the Christian religion. The latter opinion is supported by the doctrine of evolution, which is the basis of the modern philosophy. The truth of the matter is, however, that the origin of the earth is a subject which is still a matter of speculation, and which is not yet settled by the science of the day.

The first question which arises in the mind is, whether the earth was created out of nothing, or whether it was formed out of pre-existing matter. The former opinion is supported by the doctrine of creation, which is the basis of the Christian religion. The latter opinion is supported by the doctrine of evolution, which is the basis of the modern philosophy. The truth of the matter is, however, that the origin of the earth is a subject which is still a matter of speculation, and which is not yet settled by the science of the day.

The second question which arises in the mind is, whether the earth was created in a single day, or whether it was formed in a long period of time. The former opinion is supported by the doctrine of creation, which is the basis of the Christian religion. The latter opinion is supported by the doctrine of evolution, which is the basis of the modern philosophy. The truth of the matter is, however, that the origin of the earth is a subject which is still a matter of speculation, and which is not yet settled by the science of the day.

The third question which arises in the mind is, whether the earth was created by a single power, or whether it was formed by the action of many powers. The former opinion is supported by the doctrine of creation, which is the basis of the Christian religion. The latter opinion is supported by the doctrine of evolution, which is the basis of the modern philosophy. The truth of the matter is, however, that the origin of the earth is a subject which is still a matter of speculation, and which is not yet settled by the science of the day.
