17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

A recent test showed pressure communication between 7" production casing and 10-3/4" surface casing. McCullough ran a casing inspection survey which showed areas of moderate to severe corrosion of the 7" casing from 300' to 1540'. We set a Baker CIBP at 3500' WLM and capped w/15' of cement to shut off pressure and to enable us to hold this well for secondary recovery operations which have begun in the field. Work was performed 8/28/69 and 8/29/69.

Verbal approval received from Mr. Joe Ramey on 8/29/69.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
