

N. MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

NOTICE OF INTENTION TO DRILL

Notice must be given to the Oil Conservation Commission or its proper agent and approval obtained before drilling begins. If changes in the proposed plan are considered advisable, a copy of this notice showing such changes will be returned to the sender. Submit this notice in triplicate. One copy will be returned following approval. See additional instructions in Rules and Regulations of the Commission.

Dallas, Texas
Place

July 31, 1936
Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

You are hereby notified that it is our intention to commence the drilling of a well to be known as

Magnolia Petroleum Company-E.O. Carson
Company or Operator Lease

Well No. 2 in NW¹

of Sec. 33, T. 21S, R. 37E, N. M. P. M., Eunice Field, Lea County.

N.

The well is 660 feet (N) (S.) of the North line and 660 feet

(E.) (W) of the west line of Section 33

(Give location from section or other legal subdivision lines. Cross out wrong directions.)

If state land the oil and gas lease is No. No. Assignment No. No

If patented land the owner is E. O. Carson

Address Eunice, New Mexico

If government land the permittee is No

Address

The lessee is Magnolia Petroleum Company

Address Box 900 - Dallas, Texas

We propose to drill well with drilling equipment as follows:

Rotary

The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows: Financial Statement of Company has been filed with Commission and in

First Judicial District of New Mexico

We propose to use the following strings of casing and to land or cement them as indicated:

| Size of Hole | Size of Casing | Weight Per Foot | New or Second Hand | Depth | Landed or Cemented | Sacks Cement |
|--------------|--------------------------------|-----------------|--------------------|-------|--------------------|--------------|
| 15 | 12 ¹ / ₂ | | New | 290 | Cemented | 200 |
| 10 | 9 | | New | 1245 | " | 250 |
| 8 | 7 | | New | 3800 | " | 250 |

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil or gas sand should occur at a depth of about 3800 feet.

Additional information:

Approved _____, 19____
except as follows:

1. The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as $t \rightarrow \infty$. It is shown that the solutions of the system (1) tend to zero as $t \rightarrow \infty$ if and only if the matrix A is stable.

As a result of the above, the following theorem can be proved.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

Abstract: The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary middle-aged men. The subjects were divided into two groups: a control group (n = 10) and a training group (n = 10). The training group performed a 12-week training program consisting of three sessions per week, each lasting 30 minutes. The control group did not participate in any training. The HR and HRR were measured at rest and during maximal exercise at the beginning and end of the 12-week period. The results showed that the training group had a significant decrease in HR at rest and during maximal exercise, and a significant increase in HRR at rest and during maximal exercise, compared to the control group. These findings suggest that a 12-week training program can improve cardiovascular fitness in sedentary middle-aged men.
