

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	<input checked="" type="checkbox"/>	REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL			

Lovington, New Mexico, June 3rd, 1939.

Place

Date

OIL CONSERVATION COMMISSION,

Santa Fe, New Mexico.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the

Magnolia Petroleum Co. H. Corrigan Well No. 3 in the

Company or Operator

Lease

NW¹ SE¹

of Sec. 33

Title

Introduction to the Theory of Groups

by J. D. Dixon

This book is a comprehensive introduction to the theory of groups, covering the basic concepts and results of group theory, as well as the theory of representations of groups. It is suitable for students of mathematics and physics, and for researchers in the field.

The book is divided into two parts. The first part covers the basic concepts and results of group theory, and the second part covers the theory of representations of groups.

The first part of the book is divided into three chapters. Chapter 1 covers the basic concepts of group theory, including the definition of a group, the properties of groups, and the classification of groups.

Chapter 2 covers the theory of subgroups, including the definition of a subgroup, the properties of subgroups, and the classification of subgroups.

Chapter 3 covers the theory of cosets, including the definition of a coset, the properties of cosets, and the classification of cosets.

The second part of the book is divided into two chapters. Chapter 4 covers the theory of representations of groups, including the definition of a representation, the properties of representations, and the classification of representations.

Chapter 5 covers the theory of irreducible representations of groups, including the definition of an irreducible representation, the properties of irreducible representations, and the classification of irreducible representations.

The book is written in a clear and concise style, and is suitable for students of mathematics and physics, and for researchers in the field.

The book is a comprehensive introduction to the theory of groups, covering the basic concepts and results of group theory, as well as the theory of representations of groups.
