1. *Pharmaceutical industry* – The pharmaceutical industry is the largest of the three industries, with sales of \$10.5 billion in 1997. It is the only industry that has not experienced a decline in sales since 1990. The industry is dominated by a few large firms, with the top five firms accounting for 40% of sales. The industry is highly competitive, with many firms competing for market share. The industry is also highly regulated, with the FDA overseeing the approval of new drugs. The industry is expected to continue to grow, with sales projected to reach \$15 billion by 2005.

10. The following information was obtained from the records of the Department of Social Services, Division of Child Welfare, for the period from January 1, 1960, to December 31, 1960:
