reclassify.

well dropped back below 50,000, so it
should remain oil.

Dear Mr. Stogner:

Exxon Corp. requests administrative approval of a Non-Standard Proration Unit consisting of 40 acres for the F. F. Hardison "B" well #3. This well is located in Unit G, Section 34, T21S-R37E, Lea County, New Mexico. Due to the high GOR, this well is now a Blinebry Gas well and form C-102 is enclosed. The acreage offsetting this 40 acre tract, in the Exxon F. F. Hardison "B" lease that could be assigned, is already dedicated to other Blinebry Gas producers.

Administrative approval is also requested for an unorthodox location. This request is based on Rule 104-F-1 "the recompletion of a well previously drilled to a deeper horizon, provided said well was drilled at an orthodox or approved unorthodox location for such original horizon". This well was previously completed as a standard location in the Drinkard.

The following offset operators: Amoco Production Company, Chevron USA Inc. and Mobil Exploration and Production U.S. Inc. have been notified. A copy of the return receipts are enclosed. If they have no objections, I have requested that they execute a waiver and send one copy to the N.M.O.C.D. and one to me.

If there are any questions, please call me at 915/688-6782.

Sincerely,

Alex M. Correa
