

NEW MEXICO OIL CONSERVATION COMMISSION  
Santa Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in **TRIPLICATE** to the District Office, Oil Conservation Commission, before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

OIL CONSERVATION COMMISSION  
SANTA FE, NEW MEXICO

Hobbs, New Mexico  
(Place)

May 3, 1956  
(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the Byers Lease

Cities Service Oil Company  
(Company or Operator)

Well No. 3 in I  
(Unit)

NE 1/4 SW 1/4 of Sec. 7, T. 20-S, R. 38-E, NMPM., Warren-McKee, North Pool  
(40-acre Subdivision)

Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK  
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

It is proposed to move in a rotary workover rig, wash over and retrieve the fish (that is, part of the tubing catcher, 6 jts. tubing, 1-6', 2-10' Subs and an agate anchor, which were left in the hole), then clean out the sand to TD 9210'. Run a caliper log of the open hole section to determine any abnormal enlargement at the bottom of the hole which would indicate an interval that is water and sand productive. Plug back with Hydromite from TD to 9181' (28') which would leave the remaining open hole closely correlating with the producing interval in Byers No. 2, an offset flowing well. It is believed that by shutting off excessive sand entry into the well bore, the lifting costs for Byers No. 3 would be materially reduced and would restore the well to its normal oil production of 40 bbls. per day.
