

NEW MEXICO STATE LAND OFFICE
OFFICE OF THE STATE GEOLOGIST
SANTA FE, NEW MEXICO

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS REPORT ON RESULT OF SHOOTING WELL REPORT ON RESULT OF TEST OF WATER SHUT-OFF REPORT ON RESULT OF ABANDONMENT OF WELL	X	REPORT ON DEEPENING WELL REPORT ON PULLING OR OTHERWISE ALTERING CASING REPORT ON REPAIRING WELL
---	----------	--

Mr. H. G. Wells State Geologist, Wink, Texas. May 27th, 1935.
Santa Fe, N. Mex. PLACE DATE

IN THE COURT OF COMMONS
REPORT ON BUILDING & CONSTRUCTION
LONDON
1900

1. The first step in the process of developing a new product is to identify a market need. This involves conducting market research to determine what consumers want and what problems they are trying to solve. Once a need is identified, the next step is to develop a concept that addresses the need. This is often done through brainstorming sessions with a team of experts. The concept is then refined through further research and development. Once a final concept is chosen, the next step is to create a prototype. This is a physical model of the product that can be used to test the concept and gather feedback from potential users. The prototype is then used to refine the design and make any necessary changes. Once the design is finalized, the next step is to manufacture the product. This involves sourcing materials and hiring workers to produce the product. Finally, the product is distributed to the market through a sales channel. This could be through a retail store, a distributor, or directly to consumers. The entire process is iterative, meaning that it often involves going back and forth between steps as new information is gathered and the design evolves.
