

## NEW MEXICO OIL CONSERVATION COMMISSION

SANTA FE, NEW MEXICO

## MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

NOTICE OF INTENTION TO CHANGE PLANS		NOTICE OF INTENTION TO PULL OR OTHERWISE ALTER CASING	
NOTICE OF INTENTION TO REPAIR WELL		NOTICE OF INTENTION TO PLUG WELL	
NOTICE OF INTENTION TO DEEPEN WELL			

Hobbs, New Mexico - August 23, 1950

Place

Date

OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the \_\_\_\_\_  
Stanolind Oil and Gas Company D. E. Howse "A" Well No. 2 in SE/4  
 Company or Operator \_\_\_\_\_ Lease \_\_\_\_\_  
 of Sec. 11, T. 20-S, R. 38-E, N. M. P. M., House Field.  
Lea County.

## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

In an attempt to stimulate production from the Drinkard zone, it is our intention to shoot the open hole pay interval, 7745-7680', with 200 quarts SNG. The shot will be capped with 10' of pea gravel and 25' of calseal.

Following clean-out to 7781' using a reverse circulating work-over rig, a hookwall packer will be run and set at approximately 7645' to facilitate acidizing the open hole section with 4,000 gallons 15% regular acid.

Following acid treatment, the well will be swabbed in and production tests taken.

Approved \_\_\_\_\_, 19\_\_\_\_  
 except as follows:

AUG 25 1950

OIL CONSERVATION COMMISSION,  
 By Roy J. [Signature]  
 Title Oil & Gas Inspector

Stanolind Oil and Gas Company  
 Company or Operator  
 By [Signature]  
 Position Field Engineer  
 Send communications regarding well to  
 Name Ralph L. Hendrickson  
 Address P. O. Box "F"  
Hobbs, New Mexico

# THEORY OF THE EARTH

CHAPTER I

## THE EARTH AND ITS HISTORY

The Earth is a planet of the solar system, and is the only one of which we have direct knowledge. It is a sphere, and is composed of a solid inner core, a liquid outer core, and a solid crust. The crust is the part of the Earth which we live on, and is composed of various rocks and minerals. The crust is divided into continents and oceans, and is constantly changing shape. The history of the Earth is the history of the changes which have taken place in its shape and composition since it was first formed.

### THE EARTH'S HISTORY

The history of the Earth is divided into three main periods: the Pre-Cambrian, the Cambrian, and the Post-Cambrian. The Pre-Cambrian period is the earliest, and is characterized by the formation of the Earth's crust and the appearance of the first life. The Cambrian period is the middle period, and is characterized by the development of the first complex life forms. The Post-Cambrian period is the latest, and is characterized by the development of the modern life forms. The history of the Earth is a long and complex one, and it is only in recent years that we have begun to understand it.
