13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

A prior subsequent Sundry was filed 1/19/95 with a pressure chart requesting temporary abandonment for this well. It was returned by your office with a request for additional justification. That request was lost somewhere in our organization. Therefore, this 2nd Sundry is being filed with (a) the well work performed to prepare the well for T.A. and (b) an expanded justification:

(a) WELL WORK

POH with all rods & tubing and set CIPB at 6598'
Fill casing with packer fluid and pressure to 500 # for 30 minutes
Pressure held for a successful casing integrity test

USE THE PRESSURE CHART IN BLM FILES, since the copy returned to Conoco is not readable

(b) JUSTIFICATION

This wellbore needs to be re-evaluated for returning to the McKee. Also nearby production from the Blinbry, Tubb, and Drinkard warrant evaluation in this well. New discoveries in the Paddock, San Andres, and Eumont intervals in this area need to be evaluated. Budget constraints will prevent Conoco performing the workovers in this and surrounding wells to explore these possibilities until sometime in 1996.

Therefore, it is requested that this well be approved for continued temporary abandonment for another year from the filing of this Sundry.
