DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to a depth of approximately 3700' with rotary tools and from 3700' to a total depth of approximately 3920' with reverse circulation tools. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is proposed to use the following casing patterns: 10 3/4" casing to be set at approximately 250' with 250 sacks cement, cement to be circulated; 5 1/2" casing to be set at approximately 3700' with approximately 940' of sufficient cement to cover well section. If necessary, the pay section will be shot.

Approval to produce the well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
