OIL CONSERVATION COMMISSION
SANTA FE, NEW MEXICO

Hobbs, New Mexico
(Place)

December 4, 1961
(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the.....

Continental Oil Company SEMI-Permian Well No. 21 in 0
(Company or Operator) Lease (Unit)
SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Sec. 19, T. 20S, R. 36E, NMPM, Skaggs Pool
(40-acre Subdivision)
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK (FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

Well Converted to waterflood injection on 3-23-61.

Nuclear Flologs run on this well indicate that the water being injected may be going out the bottom around a cement plug. To definitely determine the course of injected water, it is proposed to run a radioactive tracer survey. If the tracer survey shows the water to be going out the bottom, it is proposed to drill out the old plug to 4000' and set a new plug from 3890-4000'. The plug will be of Firmjel with a 10 sack cement plug on top.

Permission is requested to perform the above work.

A subsequent report will be filed upon completion of this work.

Approved November 29, 19 61
Except as follows:

Approved
