SPMU-Burger B-20 No. 1-S

Hobbs, New Mexico June 28, 19 51

Well No. 1-S is located 100 ft. from N line and 100 ft. from E line of sec. 20

SW 1/4 Sec. 20 (1/4 Sec. and Sec. No.) 20N (Twp.) 35E (Range) N.M. (Meridian)

Warren-McKee (Field) San (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well with rotary tools at the above location to a total depth of approximately 2250'. All casing joints will be cemented in accordance with approved methods of the U.S. Geological Survey and any other requirements will be complied with.

It is proposed to use the following casing patterns: 10 3/4" casing to be set at approximately 250' and cemented with 250 sacks to be circulated to surface; 7 5/8" casing to be set at approximately 3000' with 1200 sacks cement, or sufficient cement to protect the salt section; 5 1/2" casing to be set at total depth and cemented with approximately 600 sacks, as determined by survey, and to be perforated opposite the pay section.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
