

8. Applicant is the operator of all acreage directly offsetting the proposed unit.

The following exhibits are attached hereto in support of this application as required by Rule III:

1. A diagrammatic sketch of the dual completion showing all casing strings, including size and setting depths, top of cement, perforated intervals, tubing strings, including size and setting depths, location of the packer, side door chokes, and other information pertinent to the proposed dual completion.
2. A plat showing to the best of our knowledge and belief the location of the No. 10 well, other wells on the lease, offset wells and the ownership thereof. The plat shows that applicant is the operator of all acreage directly offsetting the proposed gas unit.
3. A radioactivity log of the well with the tops and bottoms of producing zones and intervals to be perforated indicated thereon.

The granting of this application is in the interest of preventing waste and the protection of correlative rights.

In view of the facts set out herein, it is respectfully requested that the Commission enter an order approving the proposed dual completion as described above.

Yours very truly,

R. L. Adams
