Re: Lease Las Graces 031670(b)

Gentlemen:

Receipt is acknowledged of "Notice of Intention to Drill" dated February 27, 1957, covering your well No. 58 SEMU McKee on the subject leasehold in the NE 1/4 sec. 29, T. 20 N., R. 38 E., N.M.P.M., Warren-McKee Pool, Lea County, New Mexico.

Your proposed work is approved subject to compliance with the provisions of the "Oil and Gas Operating Regulations" revised May 25, 1942, copy of which will be furnished you on request, and subject to the following conditions:

1. Drilling operations so authorized are subject to the attached sheet (revised February 1955) for general conditions of approval.
2. Cement behind the 7 5/8" casing must cover the salt section as determined by temperature survey.

Very truly yours,

H. A. DuPont
District Engineer

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to a total depth of approximately 9200' with rotary tools in order to continue development of McKee oil reserves and to meet demands of the USGS for further development of Federal leases comprising the Southeast Monument Unit. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following casing patterns: 10 3/4" to be set at 250' and cemented with approximately 250 sacks, cement to be circulated; 7 5/8" to be set at 4000' and cemented with approximately 1875 sacks; 5 1/2" to be set at 9200', cemented with approximately 150 sacks and to be perforated opposite the pay zone.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
