17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

A Baker Model D Packer is set at 4300 with cement line tubing set to that depth. San Andres produced water is being injected into the open hole from 4327-4359.

It was our understanding that Sohio Petroleum Co. had filed this report prior to the abandonment of the Littman-San Andres Unit in 1970, but according to Mr. Sexton of the N.M. Oil Conservation Commission, this was not the case, and we are filing this report to update your records as to the status of this well.

This well was an injection well in the Littman San Andres Unit. It was retained as a SWD well when the unit terminated 10-1-70

18. I hereby certify that the foregoing is true and correct.
