### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to work over this well in the following manner:

1. Drill out cement from shoe joint to original total depth.
2. Core additional 25 to 50 feet.
3. Test any additional pay section encountered.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
