DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On March 12, 1945, 3607 ft of 7" O. D. Casing was set with 300 sacks of cement preceded by 400 sacks of mud to shut off water encountered from 3515 to 3520. Base of salt was 3260 feet. We expect to resume drilling on March 15, 1945, after allowing cement to set for 72 hours.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
