Attention: Mr. R.F. Montgomery  
Proration Manager

Gentlemen:

Please refer to your letter of April 4, 1957 in which you advise you have not received completion reports on our Amerada-State No. 2 well in Unit O, Section 1-22S-35E, Lea County, New Mexico.

This well was spudded in July of 1956 and drilled to a total depth of 3,887' and the well was dry. However, at that time we did not file the reports showing the well was plugged and abandoned as we considered going back in the hole to drill deeper. In fact we have still not made up our mind just what we want to do about this hole and that is the reason we have not filed plugging reports. A plug was set at 3,887', a second plug at 3,500' and a third plug at 1,825' and a plug on top of the 8-5/8" surface casing, so the hole is completely shut off.

We would like permission to delay filing further reports on this well until we have decided just what we want to do about it.

Very truly yours
