June 26, 1959

Mr. R. F. Montgomery Proration Manager New Mexico Oil Conservation Commission Hobbs, New Mexico

Dear Randall:

We don't know what this well will do producing into a low pressure line but we anticipate that it will probably settle to 3 to 6 barrels of oil and 600 MCF of gas per day after it is unloaded and gets to producing normally. Its current allowable for June is 4809 MCF.

Enclosed is the C 110 mentioned in the telephone conversation with you earlier this week.

Very truly yours,

CARPER DRILLING COMPANY, INC.
