County.

FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

Total depth of well is 4018'. We propose to plug this well as follows by running tubing:

Pump 30 sack cement from 4018' back to 3760', this cement plug will cover all open hole below casing and the two sets of perforations in the casing. Since no casing is to be salvaged, hole will be filled to surface with mud where a 5 sack cement plug on top of a welded plate will be run. A regulation marker will be set in the cement and the location will be cleaned and leveled.
