Oil Conservation Commission  
State of New Mexico  
Santa Fe, New Mexico

Gentlemen:

Re: Application by J. R. Cone for a Non-Standard  
Gas Proration Unit Embracing 320 Acres of  
his Mix-State Lease, Jalmat Gas Pool, Lea  
County, New Mexico.

We hereby acknowledge receipt of the above described application by Mr. J. R. Cone regarding his Mix-State No. 1 gas well in the Jalmat Gas Pool.

The Cities Service Oil Company objects to the formation of such a non-standard gas proration unit, and in support of that objection wishes to state the following:

1. The Yates formation from which the Cone Mix-State No. 1 produces gas is dipping steeply to the west in this area and it is unlikely that the west half of Section 13-22S-35E is productive of gas. There are no gas wells to the west of the Cone well which would indicate that it is productive.

2. The granting of a 320 acre gas proration unit to a well only 660' from each nearest boundary line will result in undue drainage of offsetting leases and is in direct violation of the maximum acreage assignments as provided in Rule 5(a) of Order No. R-520.

Consideration of these factors is respectfully requested before a 320 acre gas proration unit is assigned to the J. R. Cone Mix-State No. 1.

Respectfully submitted,

CITIES SERVICE OIL COMPANY

  
D. D. Bodie  
Division Superintendent
