Re: Application for 320 Acre Non
Standard Gas Proration Unit,
Jalmat Gas Pool, Lea County,
New Mexico

Attention: Mr. A. L. Porter, Jr.,
Secretary-Director

Gentlemen:

This is to request that the Oil Conservation Commission grant a 320 acre non-standard gas proration unit embracing the SE/4 of Section 24 and the NE/4 of Section 25, T22S, R35E, Lea County, New Mexico and the allowable be assigned to the Amerada State #1 gas well.

You will recall that by our letter dated July 15, 1959 we requested that NSP Order R-762 be suspended and the assigned acreage for the above mentioned well be confined to 160 acres. Subsequent production has indicated that this well is capable of producing more than one unit allowable, therefore, we are requesting that it be returned to a 320 acre unit allowable.

In support of this request we wish to state the following:

1. The Amerada State No. 1, located 660' FSL and 1980' FSL of Section 24, T22S, R35E, has been completed as a gas well from within the vertical limits of the Jalmat Gas Pool.
2. The proposed 320 acre non-standard gas proration unit consists of two adjoining quarter sections which are no longer than 5,280' in any dimension and the entire unit area may reasonably be presumed to be productive of gas.

HOBBS OFFICE OCC

3. All operators owning interest adjoining the proposed unit have been furnished copies of this application by certified mail.
4. A gas proration plat of the area indicating the proposed non-standard gas proration unit and offset ownership is attached.

An exception to Rule 3-A, Order 4-520, permitting the assignment of 320 acre non-standard gas proration unit to this well is requested.

Respectfully submitted,

ACHEMUNOIL CORPORATION
