1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The population of the United States has increased from about 100 million in 1900 to over 200 million in 1960. At the same time, the population of rural areas has decreased from about 100 million in 1900 to about 50 million in 1960. This has led to a concentration of the population in urban areas, which has had a number of important consequences for the development of the United States.

Re: Reaho Corp. - State "B" well No. 2
Sec. 25-22S-35E, Lea County, N.M.

Gentlemen:

We are enclosing herewith in triplicate the information necessary for application for ~~exception to the~~ "No-Flare" Order on the Reaho Corporation - State "B" well No. 2 in Section 25-22S-35E. NFO-277 has already been issued on well #1.

Phillips Petroleum Company is now digging ditches and laying the lines to this lease and we feel that gas connection will be made very shortly. Accordingly it will not be necessary to flare the gas for any length of time.

We would appreciate your issuing an exception to the No-Flare Order on the #2 well.

Very truly yours

REAHO CORPORATION
