

- 2) That Chevrons' H. T. Mattern (NCT-E) Well No. 15 located in Unit E of Section 12, T-22-S, R-36-E, has recently been completed as a Eumont oil well. This reduces the non-standard proration unit for Well Nos. 10 and 11 to 440-acres.

It is requested that the 440-acres continue to be simultaneously dedicated to the H. T. Mattern (NCT-E) Well Nos. 10 and 11. Also, attached is a plat outlining the proposed non-standard Gas Proration Unit, and a map showing all offset properties and wells.

In view of the facts submitted, Chevron U.S.A. Inc. requests that administrative approval of the amendment to Order No. R-1084-A be granted. If further information is required, please contact myself or David Bohon at (915) 687-7246 or (915) 687-7148, respectively.

Very Truly Yours

Alan W. Bohling
