February 16, 1955

Well No. 2 is located 1980 ft. from N line and 660 ft. from E line of sec. 6  
NE 1/4 6 22-T 36-R 127M  
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
South Tunic Las New Mexico  
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3561 ft.

### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Closson No. 2 has been shut-in. It is proposed to move in a workover unit, clean-out to bottom, log, plug back and the possible producing formations tested and acidized or reperforated as necessary. The amount of open hole to be plugged off will be determined during the progress of the work as well as the other necessary work to restore this well to producing status. The approval of the USGS will be secured if any change in the proposed remedial work is found to be necessary.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
