Re R-9073 --

State A A/c-2 #20-J 7-22-36 -- according to our records this is a TA Jalmat oil well. Should it ever be returned to production as an oil well it will create a problem with your PU. If it returned to production as a Jalmat gas well, it's location will be unorthodox for the 393.6 acre PU.

State A A/c-2 #8-P 7-22-36 -- according to our records this is a TA Jalmat gas well. If it is returned to production as a Jalmat gas well you will need to submit an acreage dedication plat showing that it shares with #5-A and #12-I. Also, you will need to file a C-104 showing a change of gas transporter to X-Cel.
