THEORY OF THE EARTH

CHAPTER I

OF THE ORIGIN OF THE EARTH

THE EARTH, as we see it, is a globe, or sphere, of a very great size, and of a very great weight.

It is composed of a solid mass of matter, and is surrounded by a fluid atmosphere.

The surface of the globe is covered with a thin layer of water, which is called the sea.

The land is composed of a solid mass of matter, and is surrounded by a fluid atmosphere.

The land is composed of a solid mass of matter, and is surrounded by a fluid atmosphere. The surface of the land is covered with a thin layer of water, which is called the sea.
