Re: Application to Dually Complete
Sinclair's proposed State 157
"A" No. 2 well in the Jalmat
Gas Pool, Lea County, New Mexico.

Gentlemen:

Sinclair Oil & Gas Company wishes to make this application for an order authorizing the dual completion of the subject well and the formation of a Non-standard Proration Unit consisting of the following described acreage to be assigned to said well.

In this connection Sinclair wishes to state:

1. Sinclair Oil & Gas Company is the Operator of the State 157 "A" No. 2 well to be drilled in the NW/4 of the SE/4 of Section 9, T-22-S, R-36-E, which will be drilled to a total depth of 3850 ft. Five and one-half inch casing will be set at 3850 ft. and cemented with 300 sacks and perforated in the queen oil zone from 3700 ft. to 3850 ft.
2. The unit on which this well is located consists of contiguous quarter quarter sections and is described as follows: SW/4 of Section 9, T-22-S, R-36-E. The well will be located 660 ft. from north and 660 ft. from west lines of this unit and, therefore, qualifies for the assignment of 160 acres under Order R-520. The length or width of said unit does not exceed 5280 ft. and it lies wholly within a single governmental section. The royalty interests and the leasehold interests are common under this unit. Subject unit may reasonably be presumed to be productive of gas.
3. Sinclair proposes to dually complete subject well in the following manner.
 - a. Perforate the 5½ inch casing from 3180 ft. to 3600 ft. in the Jalmat Gas Pool.
 - b. Perforate the 5½ inch casing from 3700 ft. to 3850 ft. in the South Eunice Oil Pool.
